## Penetration Tester

2 positions

**ACinfotec's** Penetration Testers are active learners, skilled with a practical knowledge of penetration testing and information security. As a penetration tester, you'll responsible for performing vulnerability assessment and penetration testing for top-class organizations in Thailand. This includes but not limited to finding vulnerabilities, which pave the way to get-into the system, analyses cybersecurity risks and develop reports in both technical and non-technical level for the clients.

**Base: BKK - HQ**

### What You'll Be Doing:

- Conducting vulnerability assessment and penetration testing using globally accepted methodology as well as ACinfotec in-house methodology
- Producing high quality reports that identify vulnerabilities including appropriate recommendations
- Reviewing and recommending suitable security architecture / controls for clients
- Analyzing new cybersecurity threats and incidents and write reports / blog posts
- Performing research on new security technology and solutions
- Conducting training class for clients or being public speaker as needed
- Performing other jobs as assigned

### What We'll Expect From You:

- Strong knowledge of cybersecurity

- Strong knowledge of penetration testing methodology e.g. OWASP, OSSTMM, NIST SP800-115
- Hands on penetration testing experience desired (e.g. used to work as a penetration tester)
- Experience with using, customizing and developing open source security tools for penetration testing is a plus
- Experience in multiple programming languages and shell scripting is a plus
- Experience in systems administration of Windows and Linux is a plus
- Experience in a position of network security engineer or related jobs is a plus
- Good command of English in both written and verbal communications desired
- Self-contained, able to prioritize and manage multiple projects on different timelines
- Excellent flexibility and collaborative work style
- Ability to work effectively under pressure, be a creative thinker, and have the ability to take initiative
- Occasional extended hours and weekend work necessary when performing penetration testing for clients in different time zones or as requested by clients
- Flexible weekday work hours
- Domestic and international travel required

This position offers a great opportunity to learn and experience world-class cybersecurity practice & solutions, plus close engagement with the nation's top-class organizations. Our policy is to create the best place to work for professionals with a lot of learning and training opportunities. If you feel that you have what it takes to join our company, do not hesitate to contact us.

Please provide a detailed CV including a summary of your education, past experience and also the salary expectation and e-mail to [hr@acinfotec.com](mailto:hr@acinfotec.com).
